

- Notes of the ENGR 401 Wed 6/03 workshop:
  - It is about the process and the thinking, not the answers - that is, it is not about right vs wrong.
  - Form triples (or pairs if unable) as needed (not larger)
  - I hope to see lots of discussion and even argument.
  - Do not limit yourself to the space in the forms. It isn't really enough to answer properly - yay for editing digitally. Text is ok too.
  - I will compile all the answers and anonymously feedback to the class. So we can all see the breadth of thinking.
- Additional question for each case - did any of the lenses disagree?
