

Prescription

This course introduces the fundamentals of programming in a high-level programming language (Java), using an object oriented approach to program design. Students develop their programming skills by constructing computer programs for a variety of applications. The course provides a foundation for all later courses in computer science, and develops programming skills useful for students in many other disciplines.

Course learning objectives

Students who pass this course should be able to:

1. Read, comprehend, design, and construct small programs using the Java programming language and an object-oriented design approach.

Course content

COMP 102 is about the design and construction of computer programs. The course forms a basis for later courses in Computer Science and Engineering, but will also be useful for students who want to learn computer programming but do not intend to study this subject at higher levels.

Required Academic Background

None. (Any background in programming is obviously helpful, but is neither expected nor required).

Other Classes

Each student should sign up for and attend two weekly 1 hour lab sessions:

Lab A: choose one of Thursday 1pm-2pm, 2pm-3pm, 4pm-5pm, Friday 10-11, 11-12, 12-1pm, 2pm-3pm, 3pm-4pm

Lab B: choose one of Monday 9-10, 10-11, 11-12, 5pm-6pm, Tuesday 9-10, 10-11, 5pm-6pm, 6pm-7pm

We also have optional tutorials and help desks. More details are given on our web site.

Set Texts and Recommended Readings

Required

There are no required texts for this offering.

Mandatory Course Requirements

In addition to achieving an overall pass mark of at least 50%, students must:

- submit reasonable attempts for at least eight of the ten assignments. A "reasonable attempt" is a **D** (40%) or better.. Students who have not met these mandatory requirements will be required to do make-up programming assignments in order to be able to pass the course.

If you believe that exceptional circumstances may prevent you from meeting the mandatory course requirements, contact the Course Coordinator for advice as soon as possible.

Assessment

This course will be assessed through assignments, two tests, and a final examination.

Assignments	Weekly	CLO: 1	20%
Test 1	Week 5	CLO: 1	15%
Test 2	Week 9	CLO: 1	15%
Final Examination (2 hours)		CLO: 1	50%

Penalties

Assignments submitted after the solutions are made available will generally not be marked, unless you have made arrangements on the basis of exceptional circumstances with the course coordinator . Solutions are usually made available by the beginning of the first lab session after the time the assignment was due (typically 1 hour after the deadline).

Submission & Return

Submission of assignments must be done via the ECS online submission system, accessible through the course web pages: https://ecs.victoria.ac.nz/Courses/COMP102_2018T1/Assignments. Marks and comments will be returned through the ECS marking system, also available through the course web pages.

Group Work

Students may work in pairs on the core and completion parts of the assignments, as long as they declare who they worked with on the assignment. The challenge parts of the assignments must be worked on individually.

Workload

COMP 102 is a 15pt course and therefore has nominal total workload of 150 hours. In order to maintain satisfactory progress in COMP 102, you should plan on spending at least 10 hours per week on this course. A plausible and approximate breakdown for these hours would be:

- Lectures (and optional tutorial): 3-4 hours

- Reading and preparation: 1 hour
- Lab Sessions: 2 hours
- Further work on the assignment outside the lab session: 3-4 hours

Communication of Additional Information

The primary means of communication outside of lecture will be the COMP 102 web site at https://ecs.victoria.ac.nz/Courses/COMP102_2018T1/. There you will find, among other things, more details about course requirements, the course schedule (with links to copies of the lecture slides), details and resources for the assignments, the COMP 102 Forum, ways of getting help, and the assignment submission system. The forum is a web-based bulletin board system. Questions, comments, and responses can be posted to the forum.
