

School of Engineering and Computer Science

Te Kura Mātai Pūkaha, Pūrorohiko

Prescription

This course introduces structured methods, tools and procedures for software engineering. These include the software life-cycle, common software engineering paradigms, and key elements of software engineering such as requirements analysis and specification, design, implementation, testing, maintenance, software quality assurance and software configuration management. Practical work includes the use of an integrated computer aided software engineering (CASE) environment and other development tools.

Course learning objectives

Students who pass this course should be able to:

1. Demonstrate an understanding of the main issues involved in the engineering of medium to large software systems
2. Demonstrate competence in software engineering processes, practices, and tools

Marking Criteria

Marking criteria will vary for each project and will form part of the course and project descriptions

Workload

In order to maintain satisfactory progress in SWEN 301, you should plan to spend an average of 10 hours per week on this paper, and 150 hours over the entire course. A plausible and approximate breakdown for these hours would be:

- Lectures and tutorials: 2-3 hours,
- Readings: 2-3 hours, and
- Assignments and project: 4-5 hours.

Teaching Plan

Communication of Additional Information

The main means of communication outside of lectures will be the SWEN 301 web area at https://ecs.victoria.ac.nz/Courses/SWEN301_2018T1/. There you will find, among other things, this document, the lecture schedule and assignment handouts, and the SWEN 301 Forum. The forum is a web-based bulletin board system. Questions and comments can be posted to the forum, and staff will read these posts and frequently respond to them.
