

Prescription

This course introduces the processes, practices, and tools required to engineer medium to large software systems. Topics include software craft, architecture, design, implementation, testing, maintenance, quality assurance, configuration management, and open source development. Practical work will use integrated development environments, automation, and domain specific languages.

Course learning objectives

Students who pass this course should be able to:

1. Demonstrate an understanding of the main issues involved in the engineering of medium to large software systems
2. Demonstrate competence in software engineering processes, practices, and tools

Work submitted after slip days without an extension may be marked pass/fail.

Individual personal extensions will only be granted in exceptional personal circumstances, and should be negotiated with the course coordinator before the deadline whenever possible. Documentation (eg, medical certificate) may be required.

Submission & Return

Work will be submitted and returned via ECS's submission and assessment systems.

Marking Criteria

Marking criteria will vary for each project and will form part of the course and project descriptions

Workload

In order to maintain satisfactory progress in SWEN 301, you should plan to spend an average of 10 hours per week on this paper, and 150 hours over the entire course. A plausible and approximate breakdown for these hours would be:

- Lectures and tutorials: 4 hours,
- Readings: 2-3 hours, and
- Assignments and project: 3-4 hours.

Communication of Additional Information

The main means of communication outside of lectures will be the SWEN 301 web area at https://ecs.victoria.ac.nz/Courses/SWEN301_2019T1/. There you will find, among other things, this document, the lecture schedule and assignment handouts, and the SWEN 301 Forum. The forum is a web-based bulletin board system. Questions and comments can be posted to the forum, and staff will read these posts and frequently respond to them.
