

Prescription

This course addresses the concepts, techniques and tools required for developing computer systems that are applicable where safety and reliability is paramount. Topics include the concepts and principles underlying safety critical systems, design and implementation techniques for ensuring correctness, reliability, privacy, security, dependability, survivability, and safe failure. Practical work will involve the design, implementation, and analysis of simple safety critical applications, with examples taken from mobile, web, and embedded systems deployed in healthcare, robotics, and autonomous vehicles.

Course learning objectives

Students who pass this course should be able to:

1. Describe the key principles of safety critical systems and the implications of these for software design and implementation.
2. Select and apply appropriate standards and processes to develop safety critical systems, for example IEC 61508 and MOD 00-55 / 56.
3. Analyse potential risks, hazards, threats, and failure modes in the designs of safety critical systems.
4. Design and construct software following safety critical standards, processes, and design techniques.
5. Evaluate system designs and software against safety critical standards.

Required

There are no required texts for this offering.

Mandatory Course Requirements

There are no mandatory course requirements for this course.

If you believe that exceptional circumstances may prevent you from meeting the mandatory course requirements, contact the Course Coordinator for advice as soon as possible.

Assessment

Assignment 1	CLO: 3	15%
Assignment 2	CLO: 4,5	15%
Assignment 3	CLO: 4,5	15%
Assignment 4	CLO: 4,5	15%
Exam	CLO: 1,2,3,4,5	40%

Penalties

Late submissions will incur an automatic penalty of 10% of the final mark per day. Submission between 0 and 24 hours late will be counted as one day late; those between 24 and 48 hours late will be counted as two days late, etc. Any request for an extension must be made to the lecturer in charge *prior* to the due date. Any extensions requested on the basis of medical grounds must be supported by a doctor's certificate.

Extensions

Individual extensions will only be granted in exceptional personal circumstances, and should be negotiated with the course coordinator before the deadline whenever possible. Documentation (eg, medical certificate) may be required.

Submission & Return

All work is submitted through the ECS submission system, accessible through the course web pages. Marks and comments will be returned through the ECS marking system, also available through the course web pages.

Workload

Although the workload will vary from week to week, you should expect to spend approximately 10 hours per week on the course to give a total of 150 hours study time for the course.
